The Contractor shall take reasonable measures to determine the legal liability of third parties who are liable to pay for covered services. The Contractor shall cost-avoid a claim if it establishes the probable existence of a third party or has information that establishes that third party liability exists. However, if the probable existence of third party liability cannot be established or third party liability benefits are not available to pay the claim at the time the claim is filed, the Contractor must process the claims.

If a third-party insurer requires the behavioral health recipient to pay any co-payment, coinsurance or deductible, the Contractor is responsible for making these payments, even if the services are provided outside of the Contractor's network. The Contractor is not responsible for paying coinsurance and deductibles that are in excess of what the Contractor would have paid for the entire service per a written contract with the provider performing the service, or the ADHS/DBHS fee-for-service payment equivalent. The Contractor must decide whether it is more cost-effective to provide the service within its network or pay coinsurance and deductibles for a service outside its network. For continuity of care, the Contractor may also choose to provide the service within its network. If the Contractor refers the behavioral health recipient for services to a third-party insurer and the insurer requires payment in advance of all co-payments, coinsurance and deductibles, the Contractor must make such payments in advance. Medicare cost sharing requirements are outlined in the ADHS/DBHS Provider Manual and Chapter 200 of the AHCCCS Contractor Operation Manual.

Payment of any Medicare Part D cost sharing or any Medicare Part D excluded or non-covered drugs for Non-Title XIX eligible, Non-SMI behavioral health recipients, is based on available funding as determined by the Tribal and Regional Behavioral Health Authority (T/RBHA).

b. Collections from Third Party

- 1) Total collections received do not exceed the total amount of the Contractor's financial liability for the behavioral health recipient;

- 3) Such recovery is not prohibited by State or Federal law or other regulation.

c. Reporting of collections and additional health insurance

If the Contractor knows that the third party insurer will not pay the claim for a covered service due to untimely claim filing, or as the result of the underlying insurance coverage (e.g. the service is not a covered benefit), the Contractor shall not deny the service, deny payment of the claim based on third party liability, or require a written denial letter if the service is medically necessary. The Contractor may be required to report case level detail of third-party collections and cost avoidance including number of referrals on total plan cases. The Contractor shall communicate any known change in or addition to health insurance information, including Medicare, to AHCCCS, Division of Member Services, not later than ten (10) days from the date of discovery using the AHCCCS Approved Third-Party Change Correspondence found in the ADHS/DBHS Provider Manual. In the event that the service is not covered by the third party, the Contractor shall arrange for the timely provision of the service.

d. Limitation on billing and collections

The Contractor shall comply with the ADHS/DBHS Provider Manual regarding collection of fees from behavioral health recipients. Except as provided in federal and state laws and regulations the Contractor shall not bill, nor attempt to collect payment directly or through a collection agency from a person claiming to be AHCCCS eligible without first receiving verification that the person was ineligible for AHCCCS on the date of service, or that services provided were not covered services.

8. Housing

The Contractor shall develop and manage housing services for all enrolled behavioral health recipients to the extent of available funding and including Title XIX/ XXI youth age 18 through 24 who are transitioning to the adult system of care. - e. Although the general service delivery requirements contained in this contract and the ADHS/DBHS Provider Manual set forth the requirements for services delivered to Title XIX and Title XXI children and their families, the following are highlighted expectations of the Contractor:

1) Arizona Children's Principles

The Contractor shall service all children according to the Arizona Children's Principles:

a) Collaboration with the Child and Family

Respect for and active collaboration with the child and parents is the cornerstone to achieving positive behavioral health outcomes. Parents and children are treated as partners in the assessment process, and the planning, delivery, and evaluation of behavioral health services, and their preferences are taken seriously.

b) Functional Outcomes

Behavioral health services are designed and implemented to aid children to achieve success in school, live with their families, avoid delinquency, and become stable and productive adults. Implementation of the behavioral health services plan stabilizes the child's condition and minimizes safety risks.

c) Collaboration with Others

When children have multi-agency, multi-system involvement, a joint assessment is developed and a jointly established behavioral health services plan is collaboratively implemented. Client-centered teams plan and deliver services. Each child's team includes the child and parents and any foster parents, any individual important in the child's life who is invited to participate by the child or parents. The team also includes all other persons needed to develop an effective plan, including, as appropriate, the child's teacher, the child's Child Protective Services and/or Division of Developmental Disabilities case worker, and the child's probation officer. - ii. develops an individualized service plan,
- iii. monitors implementation of the plan and
- iv. makes adjustments in the plan if it is not succeeding.

d) Accessible Services

SCOPE OF WORK

SOLICITATION NO. HP532003

Children have access to a comprehensive array of behavioral health services, sufficient to ensure that they receive the treatment they need. Case management is provided as needed. Behavioral health service plans identify transportation the parents and child need to access behavioral health services, and how transportation assistance shall be provided. Behavioral health services are adapted or created when they are needed but not available.

e) Best Practices

Behavioral health services are provided by competent individuals who are adequately trained and supervised. Behavioral health services are delivered in accordance with guidelines adopted by DHS that incorporate evidence-based "best practice." Behavioral health service plans identify and appropriately address behavioral symptoms that are reactions to death of a family member, abuse or neglect, learning disorders, and other similar traumatic or frightening circumstances, substance abuse problems, the specialized behavioral health needs of children who are developmentally disabled, maladaptive sexual behavior, including abusive conduct and risky behavior, and the need for stability and the need to promote permanency in class members' lives, especially class members in foster care. Behavioral health services are continuously evaluated and modified if ineffective in achieving desired outcomes.

f) Most Appropriate Setting

Children are provided behavioral health services in their home and community to the extent possible. Behavioral health services are provided in the most integrated setting appropriate to the child's needs. When provided in a residential setting, the setting is the most integrated and most home-like setting that is appropriate to the child's needs.

g) Timeliness

Children identified as needing behavioral health services are assessed and serviced promptly.

The unique strengths and needs of children and their families dictate the type, mix, and intensity of behavioral health services provided. Parents and children are encouraged and assisted to articulate their own strengths and needs, the goals they are seeking, and what services they think are required to meet these goals.

i) Stability

Behavioral health service plans strive to minimize multiple placements. Service plans identify whether a class member is at risk of experiencing a placement disruption and, if so, identify the steps to be taken to minimize or eliminate the risk. Behavioral health service plans anticipate crises that might develop and include specific strategies and services that shall be employed if a crisis develops. In responding to crises, the behavioral health system uses all appropriate behavioral health services to help the child remain at home, minimize placement disruptions, and

<p style="text-align: center;">SCOPE OF WORK SOLICITATION NO. HP532003</p>
--

avoid the inappropriate use of the police and the criminal justice system. Behavioral health service plans anticipate and appropriately plan for transitions in children's lives, including transitions to new schools and new placements, and transitions to adult services.

Behavioral health services are provided in a manner that respects the cultural tradition and heritage of the child and family. Services are provided in Spanish to children and parents whose primary language is Spanish.

k) Independence

Behavioral health services include support and training for parents in meeting their child's behavioral health needs, and support and training for children in self-management. Behavioral health service plans identify parents' and children's need for training and support to participate as partners in the assessment process, and in the planning, delivery, and evaluation of services, and provide that such training and support, including transportation assistance, advance discussions, and help with understanding written materials, shall be made available.

l) Connection to Natural Supports

The behavioral health system identifies and appropriately utilizes natural supports available from the child and parents' own network of associates, including friends and neighbors, and from community organizations, including service and religious organizations.

The Contractor can earn an incentive by increasing the units of support and rehabilitation services by at least 15% for each GSA (beginning with Fiscal Year 2006 for Fiscal Year 2008 incentives). 	20 %	50 %	\$	\$
	15 %	25 %	\$	\$

Following the notice of sanction, the full sanction amount shall be withheld from the next monthly payment. If the Contractor does not correct the violation within the timeframes established in the notice of sanction, DHS may impose an additional penalty, which at the discretion of DHS, may be equal to or greater than the penalty for the first violation multiplied by one (1) plus the number of additional months (or portion of a month) during which the violation continues.

If Contractor is found by DHS to have violated the same Contract provision on two or more occasions within a two (2) year period, then DHS, at its discretion, may increase the amount of the first month's penalty by an amount not to exceed the amount of the penalty for the first violation multiplied by (one (1) plus the number of repeat violations).

If the sanction from AHCCCS applies to more than one contractor, but AHCCCS does not delineate individual contractor responsibility, DHS may apportion sanctions to the Contractor based on an equitable method that accounts for the Contractor's share of responsibility.
- 4) DHS shall impose on Contractor any financial sanctions imposed on DHS by AHCCCS related to Contractor's performance under this agreement. In the event that AHCCCS imposes sanctions upon DHS, Contractor shall reimburse DHS upon demand, or DHS shall process a withhold, any such sanction or disallowance amount or any amount determined by AHCCCS to be unallowable, after exhaustion of the appeals process (if federal regulations so permit) as long as the federal government does not levy the sanctions until after the appeals process is completed. Contractor shall bear the administrative cost of such an appeals process.
- 5) Any recoupments imposed by the federal government and passed through to the Contractor shall be reimbursed to DHS upon demand.
- 6) The Contractor may file an appeal to any sanctions imposed by DHS in accordance with the processes outlined in Special Terms and Conditions Paragraphs H.2 or H.3.
